EDUCATION

BSc in Computer Science and
Engineering

American International University Bangladesh
Year: 2023-2026

SKILLS

- Programming: C, C++, C#, Python, JavaScript, PHP
- Web Technologies: HTML5, CSS3, ASP.NET Core MVC, ASP.NET Framework
- Databases: MySQL, Oracle
- Testing: Manual Testing, Test-Case Design, Functional Testing, Regression Testing, Bug Reporting
- Tools: Git, GitHub, Visual Studio
- Concepts: OOP, MVC Architecture, Database Design

LANGUAGE

Bengali – Native

English – Professional Working Proficiency

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on experience developing web applications using ASP.NET Core MVC, ASP.NET Framework, PHP, JavaScript, and MySQL. Familiar with manual testing, test-case design, defect identification, and software development life-cycle principles. Built clinic management, e-commerce, and pet adoption applications with authentication, database integration, and administrative features. Seeking an entry-level Software QA or Web Development opportunity.

ACADEMIC PROJECTS

Smart Clinic Management System (ASP.NET MVC Core)

- Developed a comprehensive clinic management web application enabling patients to book appointments by specialty and department with real-time scheduling.
- Implemented a fully functional Admin Dashboard with CRUD operations for managing doctors, users, and appointment data.
- Developed an automated PDF generation feature for payment receipts and appointment schedules, enhancing operational efficiency.
- Applied MVC architectural pattern ensuring a clean, scalable, and maintainable codebase.

♦ My Mini Mart – Online Supermarket (ASP.NET Framework)

- Built a fully operational e-commerce grocery platform supporting product browsing, cart management, and order processing.
- Integrated a multi-channel payment gateway supporting online mobile banking and card-based transactions, ensuring a seamless checkout experience.
- Designed a responsive product catalog with dynamic add-to-cart functionality, improving user shopping experience.
- Utilized ASP.NET Framework's robust back-end capabilities to implement secure session management and user authentication.

♦ Pet Adoption Centre – Web Application

- Developed a full-stack pet adoption and services platform allowing users to browse and adopt pets including dogs, cats, rabbits, and tortoises.
- Integrated dedicated modules for pet accessories and pet healthcare services, creating a comprehensive one-stop portal for pet owners.
- Designed an intuitive and responsive UI enhancing user engagement and navigation across multiple service sections.
- Implemented dynamic server-side functionality using PHP for form handling, user sessions, and database interactions.

CERTIFICATIONS & AWARDS

Currently working to pursue relevant certifications in Software Quality Assurance.

Open to earning credentials in:

ISTQB Foundation Level – Software Testing
